## SCIENCE-CHEMISTRY

Unlocking Elements – Metals & Non-Metals\* ✨

To identify common metals and non-metals around us and understand their uses in daily life.

1. Choose any 2 metals and 2 non-metals that you can find or observe in everyday life.
2. Discover how each of them is used in our daily activities, tools, or objects.

Class Work:

Based on your research, prepare a colourful chart

\*Clearly label each element as 'Metal' or 'Non-Metal' and mention its use.

\*Write one real-life example for each element showing where you have seen or used it.

\*Make your work creative and fun — add drawings, pictures, or small samples if possible.

**Note: Information and pictures to be collected during vacation; the final chart will be made in class.**

## SOCIAL SCIENCE

### A Postcard from Ancient India

Imagine you are a time-traveler who has visited an ancient Indian Gurukul. During your vacation, collect the following information through reading or research:

1. Daily Life: Describe a typical day in the life of a student at the Gurukul – from waking at dawn to evening prayers.
2. Subjects Studied: List the subjects taught, such as the Vedas, mathematics, astronomy, archery, and music.

Based on your collected data, write a postcard to your friend describing your experience in the Gurukul. Share what you saw, learned, and how it felt to live like a student in ancient India.

**Note: Information is to be collected during vacation; the postcard preparation will be done in class.**
